Overview

IBM® Cognos® Controller V10.1.1 is financial consolidation software that supports the complete, close, and consolidated report process, all in one solution managed by the Finance office.

IBM Cognos Controller V10.1.1 offers the following enhancements:

- Improved reporting and closing efficiency with the introduction of Cognos Controller Command center for both reporters and controllers
- Improved installation by simplifying the installation process
- Additional improvements to the Financial Analytics Publisher solution, taking the seamless integration with IBM Cognos TM1®

Other improvements further help reporters and controllers benefit from the IBM Cognos Controller solution.

IBM Cognos Controller V10.1.1 contains the following conformance items:

- IBM DB2® native support - IBM Cognos Controller V10.1.1 supports IBM DB2 V9.7 FP1 as the transaction data system.
- IBM Cognos TM1 V10.1 - IBM Cognos Controller ships with IBM Cognos TM1 for use with Financial Analytic Publisher.
- IBM Cognos Controller supports IBM Cognos Business Intelligence V10.1.1, as part of the application offering.
- IBM Cognos Controller supports IBM Cognos Business Viewpoint V10.1.1.
- IBM Cognos Controller supports IBM Cognos Financial Statement Reporting (FSR) V6.6.1.
- IBM Cognos Controller supports Adobe™ Acrobat X.
- IBM Cognos Controller supports Microsoft™ Internet Explorer 9.

For complete licensing and packaging details, visit

<http://www-01.ibm.com/software/analytics/cognos/controller/>

Key prerequisites

For details, refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

- June 5, 2012: Electronic availability
- June 12, 2012: Media availability

Refer to the complete letter for national language availability.

Description

IBM Cognos Controller V10.1.1 provides the following important new and improved features.

Enterprise readiness

Improved Status functionality with Command Center® menu - For reporting units, the new solution lets you carry out tasks such as data entry, reconciliation, and status updates from the new Command Center menu. Group level users can possibly monitor the status progress, assign tasks, and send email notifications from the Command Center menu.

Enhanced install process - To facilitate and streamline the installation, the installation process is improved in several areas in the following text.

General improvements

- FAP Installation is split into two separate parts - FAP Server and FAP Client.
- FAP Service is automatically registered by install kit (Local System account).
- Java™ Runtime is automatically installed through dependency for FAP Server and Web Services Server.
- There is no need to define Java location through environment variable.
- There is no need to install Windows™ 2003 Support Tools.
- Installer automatically creates ccrvdir folder for mapping of Controller virtual directory in IIS.
- CCRLocalClient.msi contains an unpacked integration directory in order to reduce size of user profiles on Citrix.

Updater improvements

- Updater checks for any running IBM Cognos Services and attempt to stop them before installation.
- Updater does not run until all running IBM Cognos Services are stopped.
- Updater does not overwrite existing settings. New configuration files are provided but given a .new extension.

User Account Control (UAC)

- Controller Configuration has manifest to ensure proper handling by UAC (elevation of privileges).
- CCRLocalClient.MSI embedded has manifest to ensure proper handling by UAC (elevation of privileges).

Error messaging

- Controller Configuration error messages provide greater detail to allow for better supportability.
- Controller error messages provide greater detail to allow for better supportability (error messaging in client can be disabled).

Updates to Financial Analytic Publisher (FAP) - Continued investments in the FAP solution include four main improvements:

- New log files for better support and analysis - There are two new log files replacing the old ones. These include history to better help troubleshoot any FAP related questions.
- Possible to select port for SQL and DB2 - The port edit field is now also available for SQL and DB2 . In earlier releases, you could only select port for Oracle databases.
- Possible to select multiple periods for the same consolidation type - To limit the number of published consolidation structures, with IBM Cognos Controller, V10.1.1 you can select multiple ranges of the same consolidation type when adding a datamart.
- Enhanced naming convention for dimensions - To avoid conflicts in conjunction with other IBM Cognos products, you can name all FAP dimensions with a suffix or prefix.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

http://www.ibm.com/able/product_accessibility/index.html

Availability of national languages

Some components may not be translated into the languages listed below.

Publications

No publications are shipped with this product.

The IBM Publications Center

<http://www.ibm.com/shop/publications/order>

The Publications Center is a worldwide central repository for IBM product publications and marketing material with a catalog of 70,000 items. Extensive search facilities are provided. Payment options for orders are via credit card (in the U.S.) or customer number for 20 countries. A large number of publications are available online in various file formats, and they can all be downloaded by all countries.

Technical information

Specified operating environment

Hardware requirements

For complete details concerning the minimum hardware requirements to install and run IBM Cognos software, refer to the installation and configuration guide for each product. The installation and configuration guides can be found at

<http://publib.boulder.ibm.com/infocenter/cfpm/v10r1m0/index.jsp>

Software requirements

For complete details concerning the minimum software requirements to install and run IBM Cognos software, refer to the *Installation and Configuration Guide* for each product. The *Installation and Configuration Guides* can be found at

<http://publib.boulder.ibm.com/infocenter/cfpm/v10r1m0/index.jsp>

Software environment statement

IBM Cognos product strategy includes influencing industry-standard platforms such as operating systems, databases, and application servers. In order to provide the best service possible, IBM enables each of our products to run on specific versions of these platforms. For complete details concerning supported software environments for IBM Cognos software, visit

<http://www-01.ibm.com/support/docview.wss?uid=swg27014433>

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a README file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Limitations

For additional information, refer to [Usage restriction](#) in the [Terms and conditions](#) section of this announcement, or to the license information document that is available on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Planning information

Installability

Software Subscription and Support (also referred to as Software Maintenance) is included with licenses purchased through Passport Advantage and Passport Advantage Express® . Product upgrades and technical support are provided by the Software Subscription and Support (also referred to as Software Maintenance) offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software, and technical support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support (also referred to as Software Maintenance) with each program license acquired. The initial period of Software Subscription and Support (also referred to as Software Maintenance) can be extended by the purchase of a renewal option, if available.

Security, auditability, and control

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Global Technology Services

Contact your IBM representative for the list of selected services available in your country, either as standard or customized offerings for the efficient installation, implementation, or integration of this product.

Ordering information

For ordering information, consult your IBM representative or authorized IBM Business Partner, or visit

<http://www-306.ibm.com/software/support/pa.html>

This product is only available via Passport Advantage . It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software Value Plus.

For more information about Software Value Plus, visit

<http://www-01.ibm.com/software/info/itsolutions/softwarevalueplus/>

To locate IBM Business Partners Software Value Plus in your geography for a specific Software Value Plus portfolio, contact your IBM representative.

Charge metrics definitions

Authorized User

Authorized User is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. The program may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the program at one time. Licensee must obtain separate, dedicated entitlements for each Authorized User accessing the program in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User and may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Note: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Install

Install is a unit of measure by which the program can be licensed. An install is an installed copy of the program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each install of the program.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage , where applicable, are license only and do not include Software Maintenance.

This software license includes Software Subscription and Support (also referred to as Software Maintenance).

License Information form number

Program name	Program number	Form number
IBM Cognos Controller	5724-w24	L-LCOE-8RKRDE

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Limited warranty

IBM warrants that when the program is used in the specified operating environment, it will conform to its specifications. The warranty applies only to the unmodified portion of the program. IBM does not warrant uninterrupted or error-free operation of the program or that IBM will correct all program defects. You are responsible for the results obtained from the use of the program.

IBM provides you with access to IBM databases containing information on known program defects, defect corrections, restrictions, and bypasses at no additional

charge. For further information, consult the *IBM Software Support Handbook* found at

<http://www.ibm.com/support/handbook>

IBM will maintain this information for at least one year after the original licensee acquires the program (warranty period).

Program technical support

Technical support of a program product version or release will be available for a minimum of five years from the general availability date, as long as your Software Maintenance is in effect. This technical support allows you to obtain assistance (via telephone or electronic means) from IBM for product-specific, task-oriented questions regarding the installation and operation of the program product. Software Maintenance also provides you with access to updates (modifications or fixes), releases, and versions of the program. You will be notified, via announcement letter, of discontinuance of support with 12 months' notice. If you require additional technical support from IBM, including an extension of support beyond the discontinuance date, contact your IBM representative or IBM Business Partner. This extension may be available for a fee.

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Usage restriction

Yes

For additional information refer to the License Information Document that is available on the IBM Software License Agreement Web site

<http://www.ibm.com/software/sla/sladb.nsf>

Software Subscription and Support applies

Yes. Software Subscription and Support is included with licenses purchased through Passport Advantage and Passport Advantage Express. Product upgrades and technical support are provided by the Software Subscription and Support offering as described in the Agreements. Product upgrades provide the latest versions and releases to entitled software and Technical Support provides voice and electronic access to IBM support organizations, worldwide.

IBM includes one year of Software Subscription and Support with each program license acquired. The initial period of Software Subscription and Support can be extended by the purchase of a renewal option, if available.

While your Software Subscription and Support is in effect, IBM provides you assistance for your routine, short duration installation and usage (how-to) questions, and code-related questions. IBM provides assistance via telephone and, if available, electronic access, to your information systems (IS) technical support personnel during the normal business hours (published prime shift hours) of your IBM support center. (This assistance is not available to your end users.) IBM provides Severity 1 assistance 24 hours a day, 7 days a week. For additional details, consult your *IBM Software Support Handbook* at

<http://www.ibm.com/support/handbook>

Software Subscription and Support does not include assistance for the design and development of applications, your use of programs in other than their specified operating environment, or failures caused by products for which IBM is not responsible under the applicable agreements.

For additional information about the International Passport Advantage Agreement and the IBM International Passport Advantage Express Agreement, visit the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

System i Software Maintenance applies

No

Educational allowance available

Education allowance does not apply.

Special education prices are available for qualified customers through Passport Advantage .

IT system security involves protecting systems and information through prevention, detection, and response to improper access from within and outside your enterprise. Improper access can result in information being altered destroyed or misappropriated or can result in misuse of your systems to attack others. Without a comprehensive approach to security, no IT system or product should be considered completely secure and no single product or security measure can be completely effective in preventing improper access. IBM systems and products are designed to be part of a comprehensive security approach, which will necessarily involve additional operational procedures, and may require other systems, products, or services to be most effective. IBM does not warrant that systems and products are immune from the malicious or illegal conduct of any party.

IBM Electronic Services

IBM has transformed its delivery of hardware and software support services to help you achieve higher system availability. Electronic Services is a web-enabled solution that offers an exclusive, no-additional-charge enhancement to the service and support available for IBM servers. These services are designed to provide the opportunity for greater system availability with faster problem resolution and preemptive monitoring. Electronic Services comprises two separate, but complementary, elements: Electronic Services news page and Electronic Services Agent.

The Electronic Services news page is a single Internet entry point that replaces the multiple entry points traditionally used to access IBM Internet services and support. The news page enables you to gain easier access to IBM resources for assistance in resolving technical problems.

The Electronic Service Agent™ is no-additional-charge software that resides on your server. It monitors events and transmits system inventory information to IBM on a periodic, client-defined timetable. The Electronic Service Agent automatically reports hardware problems to IBM . Early knowledge about potential problems enables IBM to deliver proactive service that may result in higher system availability and performance. In addition, information collected through the Service Agent is made available to IBM service support representatives when they help answer your questions or diagnose problems. Installation and use of IBM Electronic Service Agent for problem reporting enables IBM to provide better support and service for your IBM server.
