IBM®

Additional feature for IBM Cognos Business Intelligence V10.2.1

Table of contents

Overview

IBM® Cognos® Business Intelligence V10.2.1 provides capabilities for query, reporting, analysis, and dashboarding and enables you to gather and organize information from multiple sources. IBM Cognos Business Intelligence V10.2.1 delivers analytics that everyone can use to answer key business questions.

IBM Cognos Business Intelligence V10.2.1 provides the ability for users to:

- Easily view, assemble, and personalize information to follow a train of thought and generate a unique perspective.
- Explore all types of information from all angles to assess the current business situation to have a deeper understanding of the patterns that exist in data.
- Analyze facts and anticipate strategic implications by simply shifting from viewing data to performing more advanced predictive or what-if analysis.
- Gain consistent access to information everywhere including on the web, desktop, and mobile devices.

IBM Cognos Business Intelligence V10.2.1 now additionally supports IBM Cognos TM1® V10.2 as a data source.

Planned availability date

September 10, 2013: Electronic availability

September 13, 2013: Media availability

Refer to the Availability of national languages section for national language availability.

Description

IBM Cognos Business Intelligence V10.2.1 adds support for IBM Cognos TM1 V10.2 as a data source.

Additionally, IBM Cognos Business Intelligence V10.2.1 will be the last version to support conformance for the following:

IBM Cognos Mobile:

- Native application for BlackBerry 6 and 7 operating systems

- Web application for BlackBerry PlayBook
- Native and web application for Apple iOS 5

IBM Cognos Business Intelligence:

- Application server
  - JBoss 4.2
- Portals
  - IBM Lotus® Connection V2.5 or V3.0
- Screen readers
  - Job Access With Speech (JAWS) 11 or 12
- Data sources
  - IBM DB2® 9.1
  - Microsoft™ SQL Server 2000 or 2005
  - Microsoft SQL Server Analysis Services 2005
  - MySQL 5.1
  - ParAccel Analytic Database 2.5, 3.0, or 3.1
  - PostgreSQL 8.4
  - Sybase Adaptive Server Enterprise 15.5
  - Sybase IQ 12.7 ESD 3
  - Vertica 4.0 or 6.0
- Identity management
  - Microsoft Active Directory 2003 or 2003 R2
- Web servers
  - IBM HTTP V6.0, V6.1, or 7.0

IBM Cognos Business Intelligence V10.2.1 will be the last release to provide entitlement to use IBM Connections as a licensed supporting program. The ability to integrate with IBM Connections will remain part of the IBM Cognos Business Intelligence product. For more information about IBM Connections, visit

Charge metrics definitions

Authorized User

Authorized User is a unit of measure by which the program can be licensed. An Authorized User is a unique person who is given access to the program. The program may be installed on any number of computers or servers and each Authorized User may have simultaneous access to any number of instances of the program at one time. Licensee must obtain separate, dedicated entitlements for each Authorized User accessing the program in any manner directly or indirectly (for example, via a multiplexing program, device, or application server) through any means. An entitlement for an Authorized User is unique to that Authorized User an may not be shared, nor may it be reassigned other than for the permanent transfer of the Authorized User entitlement to another person.

Note: Some programs may be licensed where devices are considered users. In that case, the following applies. Any computing device that requests the execution of or receives for execution a set of commands, procedures, or applications from the

program or that is otherwise managed by the program is considered a separate user of the program and requires an entitlement as if that device were a person.

Processor Value Unit (PVU)

PVU is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by processor value, brand, type, and model number at

http://www.ibm.com/software/lotus/passportadvantage/
pvu_licensing_for_customers.html

and the number of processors made available to the program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either full capacity licensing or virtualization capacity (sub-capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (refer to the webpage below). If using full capacity licensing, licensee must obtain PVU entitlements sufficient to cover all activated processor cores* in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using virtualization capacity licensing, licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/
Counting_Software_licenses_using_sp ecific_virtualization_technologies.html

* An activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes:

- Some programs may require licenses for the program **and** what is being managed. In that case, the following applies. In addition to the entitlements required for the program directly, licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis **only** . In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies. Rather than obtaining entitlements for the activated processor cores available to the program, licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.

Cross-platform products

Cross-platform products for use on System z

Order the part numbers that follow when the product is used for either the development of code that will be deployed on System z servers or when the product will be communicating or transferring data between a distributed server

and a System z server. Otherwise order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Cross-platform product for use on System z IFL engines or zEnterprise BladeCenter Extension

Order the part numbers that follow when the product is intended to run on the zEnterprise BladeCenter Extension or Linux operating system on System z IFL engines. If the product is not intended to run in these environments, order from the other set of part numbers in this announcement. This set of part numbers provides the identical supply and authorization as the other set in this announcement.

Terms and conditions

The terms and conditions for IBM Cognos Business Intelligence V10.2.1 as
previously announced in Software Announcement ZP13-0328, dated June 11, 2013
are unchanged.

Prices

The charges are unchanged by this announcement.

Announcement countries

All European, Middle Eastern and African countries except:

   Iran
   Sudan
   Syria

Trademarks

IBM, Cognos, TM1, Lotus, DB2, Global Technology Services, Passport Advantage,
System z, Express, zEnterprise and BladeCenter are registered trademarks of IBM
Corporation in the United States, other countries, or both.

Microsoft is a trademark of Microsoft Corporation in the United States, other
countries, or both.

Linux is a registered trademark of Linus Torvalds in the United States, other
countries, or both.

Intel is a trademark of Intel Corporation or its subsidiaries in the United States and other countries.

Other company, product, and service names may be trademarks or service marks of others.

Terms of use

IBM products and services which are announced and available in your country can be ordered under the applicable standard agreements, terms, conditions, and prices in effect at the time. IBM reserves the right to modify or withdraw this announcement at any time without notice. This announcement is provided for your information only. Reference to other products in this announcement does not necessarily imply those products are announced, or intend to be announced, in your country. Additional terms of use are located at

http://www.ibm.com/legal/us/en/

For the most current information regarding IBM products, consult your IBM representative or reseller, or visit the IBM worldwide contacts page
