

# Sub-capacity licensing for IDS Enterprise Unlimited Users Edition V10 improves flexibility and price/performance

## Overview

IBM continues to lead the industry in delivering On Demand Business solutions. To expand those On Demand offerings, sub-capacity licensing benefits are now extended to IDS Enterprise Unlimited Users Edition V10, offering more flexible pricing and financing models that enable you to exploit new technology.

To take advantage of sub-capacity licensing for IDS Enterprise Unlimited Users Edition V10, IBM Tivoli® License Compliance Manager for IBM Software V2.2 is required. This tool tracks and reports your software assets so you can take advantage of these flexible pricing terms. Refer to the **Terms and conditions** section for more information.

New and existing Passport Advantage® customers, who want to use sub-capacity pricing, must agree to the terms of an attachment to their Passport Advantage Agreement and submit a new Passport Advantage Enrollment Form to IBM or an authorized IBM Business Partner. Refer to the **Terms and conditions** section for more information.

Sub-capacity licensing is a strategic IBM offering within the On Demand portfolio. It lets you license selected IBM products for use on less than the full-processor capacity of your machine, when they are used within one or more partitions. For a list of partitioning technologies supported under sub-capacity licensing terms, refer to Software Announcement 206-090, dated April 25, 2006.

In addition, the names of all IDS Enterprise Unlimited Editions have been changed to IDS Enterprise Unlimited Users Editions to clarify existing terms in the product name itself. This is a name change only. Licensing and terms and conditions are unaffected.

## Planned availability date

- October 20, 2006: Electronic software delivery
- October 20, 2006: Media and documentation

---

### For ordering, contact:

Your IBM representative, an IBM Business Partner, or the Americas Call Centers at

## Required and entitled license capacity

The quantity of each Passport Advantage program, needed to satisfy applicable terms, is referred to as the required license capacity. The quantity of each Passport Advantage program that you have acquired is referred to as your entitled license capacity. For each applicable program, you are responsible to ensure that you maintain the required number of software licenses to comply with the terms and conditions of the agreement. If you determine that additional software licenses are required, you must purchase them from IBM or your IBM Business Partner.

## Cross-platform product for use on zSeries

Order the part numbers that follow when there is an intention to acquire this cross-platform product for deployment on the zSeries/S/390® platform. This set of part numbers provides the identical supply and authorization as the other set in this announcement. The distinction is to identify the planned deployment platform.

Program name/description	Part number
IDS Enterprise Edition Unlimited zSeries Value Unit Sub-Capacity Lic+SW Maint 12 Mo	D59M4LL
IDS Enterprise Edition Unlimited zSeries Value Unit Sub-Capacity Annual SW Maint Rnw1	E0322LL
IDS Enterprise Edition Unlimited zSeries Value Unit Sub-Capacity SW Maint Reinststate 12 Mo	D59M5LL
IDS Enterprise Edition Unlimited Value Unit Sub-Capacity Lic+SW Maint 12 Mo	D59M6LL
IDS Enterprise Edition Unlimited Value Unit Sub-Capacity Annual SW Maint Rnw1	E0323LL
IDS Enterprise Edition Unlimited Value Unit Sub-Capacity SW Maint Reinststate 12 Mo	D59M7LL

To further assist with compliance, IBM will compare your required license capacity with your entitled license capacity each quarter. If your required license capacity exceeds your entitled license capacity, IBM will expect to have received your order for the applicable Passport Advantage software programs. If you have not placed an order, IBM will initiate a quote for additional license capacity for that program. To issue a purchase order for the required additional license capacity, contact IBM or your IBM Business Partner. Regardless whether you place an order for additional capacity, you will be charged for excess capacity used.

## License requirements

The quantity of processor Value Units required under sub-capacity licensing is dependent upon the type of processor core running the software licensed under sub-capacity terms. The determination includes the number of physical, logical, or virtual processor cores available to the software running across servers at a point in time, and upon the type of processor core running the software. For example, if you run IDS Enterprise Edition Unlimited Users V10.0 on a system with two IBM POWER5™ processor cores in a partition, you would require 200 processor Value Units to be compliant with sub-capacity terms.

## Other requirements

If you order this product under sub-capacity terms, IBM Tivoli License Compliance Manager for IBM Software V2.2 will be made available to you if you do not already have it (refer to below). You must install and configure this tool for your sub-capacity products. Once the license manager software is installed, you are required to register online. (IBM may need to contact you to finalize the registration process.) You must monitor program use on a continuous basis with this tool and submit IBM Use Reports to IBM on a quarterly basis.

IBM Tivoli License Compliance Manager for IBM Software V2.2 is documented in publications which are available from the IBM Publications Center at

<http://www.elink.ibm.com/public/applications/publications/cgibin/pbi.cgi>

For IBM Tivoli License Compliance Manager for IBM Software V2.2 guidance and instructions, refer to

<http://www.lotus.com/sub-capacity>

This Web site will indicate how to set up the compliance manager, any required maintenance, and any required steps unique to IDS Enterprise Unlimited Users Edition V10.

Refer to Software Announcement 206-154, dated July 25, 2006, for details on Processor Value Units (PVUs).

## Terms and conditions

This product is only available via Passport Advantage. It is not available as shrinkwrap.

Sub-capacity licensing is available for newly acquired licenses of selected Passport Advantage programs that are licensed on a processor Value Unit basis. These programs may be used on supported platforms, with the programs running in only some of the partitions. A customer may order sub-capacity licensed products to run in a full-capacity environment — or operate on multiple partitions that sum to full-capacity.

### Eligibility requirements

To be eligible for sub-capacity licensing terms, you must use IBM Tivoli® License Compliance Manager for IBM Software V2.2 to monitor program use and submit to IBM an IBM Use Report each calendar quarter. Passport Advantage customers must agree to the terms of an attachment to your Passport Advantage agreement and submit a modified Passport Advantage enrollment form. Additional requirements for sub-capacity licensing terms are found in Software Announcement 206-090, dated April 25, 2006.

Sub-capacity terms are not currently available for customers who use the Sun Fire T1000 or Sun Fire T2000 servers. IBM middleware running on these servers is licensed according to the requirements set forth in Software Announcement 206-063, dated March 28, 2006.

Changing the name for all IDS Enterprise Unlimited Editions to IDS Enterprise Unlimited Users Editions is a name change only. Licensing and terms and conditions are unaffected.

---

## Prices

---

The charges are unchanged by this announcement.

### ***IBM Global Financing***

IBM Global Financing offers competitive financing to credit-qualified customers to assist them in acquiring IT solutions. Offerings include financing for IT acquisition, including hardware, software, and services, both from IBM and other manufacturers or vendors. Offerings (for all customer segments: small, medium, and large enterprise), rates, terms, and availability can vary by country. Contact your local IBM Global Financing organization or visit

<http://www.ibm.com/financing>

IBM Global Financing offerings are provided through IBM Credit LLC in the United States and other IBM subsidiaries and divisions worldwide to qualified commercial and government customers. Rates are based on a customer's credit rating, financing terms, offering type, equipment type, and options, and may vary by country. Other restrictions may apply. Rates and offerings are subject to change, extension, or withdrawal without notice.

IBM Financing Advantage is available to qualified customers.
