At a glance

IBM® Informix® Ultimate Warehouse Edition:

- Provides fast and predictable query response times on analytical workloads
- Can help lower overall operating costs by significantly reducing requirements for database tuning
- Significantly improves performance of analytical queries running on IBM Informix Ultimate Edition without requiring application changes
- Enables customers to leverage the same database environment for mixed workloads

For ordering, contact your IBM representative, an IBM Business Partner, or IBM Americas Call Centers at 800-IBM-CALL (Reference: YE001).

Overview

IBM Informix Ultimate Warehouse Edition is a high-performance offering for IBM Informix, delivering dramatically faster analytic query responses transparently to users when compared to an existing Informix environment without the capabilities available with the Informix Ultimate Warehouse Edition. It integrates into an IBM Informix data warehouse environment, providing high-performance query software that is based on advanced in-memory technology.

The IBM Informix Ultimate Warehouse Edition consists of the following components:

- IBM Informix Ultimate Edition
- IBM Informix Warehouse Accelerator
- IBM Informix Storage Optimization Feature

Key prerequisites

Refer to the [Hardware requirements](#) and [Software requirements](#) sections.

Planned availability date

March 29, 2011: Electronic availability

April 7, 2011: Media availability

Description

IBM Informix Ultimate Warehouse Edition addresses the following client challenges:

- Long-running queries with unpredictable response time that do not allow for ad hoc processing
- Need for DBA to tune the system, with increasingly inadequate results, due to the ad hoc, unpredictable nature of the data warehouse / analytical requests
- Leveraging the same database server environment for mixed workloads

Informix Ultimate Warehouse Edition provides:

- Faster query response times on unpredictable and long-running query workloads
- Help in lowering operating costs by reducing database tuning efforts
- Improved performance on analytical queries compared to your existing Informix environment
- The ability to run mixed workloads

To accomplish these results, Informix Ultimate Warehouse Edition does not require changes in the business intelligence or data warehouse application or the application framework running in an existing Informix environment, because Informix remains the query engine and will offload the specific query to the Informix Warehouse Accelerator.

The implementation and administration of the IBM Informix Ultimate Warehouse Edition is supported by graphical tooling within the IBM Smart Analytics Studio. This provides easy-to-use graphical interfaces to configure and prepare data for deployment.

Informix Ultimate Warehouse Edition is designed to help mitigate database administration costs while significantly speeding up the performance of typical data warehouse or OLAP-specific workloads, in many cases by an order-of-magnitude or more. The Informix Ultimate Warehouse solution enables selected Informix query workloads to be redirected to another processing entity, namely the Informix Warehouse Accelerator. The Informix Warehouse Accelerator is designed as a logical extension to the Informix engine for quick off-loading and processing.

Accessibility by people with disabilities

A US Section 508 Voluntary Product Accessibility Template (VPAT) can be requested via the IBM website

http://www.ibm.com/able/product_accessibility/index.html

Section 508 of the US Rehabilitation Act

Informix Ultimate Warehouse Edition is capable as of April 7, 2011, when used in accordance with IBM's associated documentation, of satisfying the applicable requirements of Section 508 of the Rehabilitation Act, provided that any assistive technology used with the product properly interoperates with it. A US Section 508 Voluntary Product Accessibility Template (VPAT), containing details on the products accessibility compliance, can be requested at

http://www.ibm.com/able/product_accessibility/index.html

The following third-party products are not covered under the IBM license agreement:

IBM product name	Third-party product
Informix Ultimate wrhs Ed	Sentinel Server Studio

IBM makes no representation about the Section 508 status of these third-party products included in this offering. Contact the vendor for specific, current information on the Section 508 status of these products.

Product positioning

IBM Informix Ultimate Warehouse Edition is part of the IBM Informix family and joins a comprehensive IBM data warehousing and business intelligence solution for IBM Informix. IBM Informix Ultimate Warehouse Edition provides clients who have a majority of their data maintained on IBM Informix, XPS, or Red Brick™, the opportunity to further leverage the Informix platform for cost-effective data warehousing and business intelligence solutions.

Education support

IBM training provides education to support many IBM offerings. Descriptions of courses for IT professionals and managers are on the IBM training website

<http://www.ibm.com/services/learning/>

Call IBM training at 800-IBM-TEACH (426-8322) for catalogs, schedules, and enrollments.

Available from IBM training, the newest offerings to support your training needs, enhance your skills and boost your success with IBM software. IBM offers a complete portfolio of training options, including traditional classroom, private onsite and eLearning courses. Many of our classroom courses are part of IBM's "Guaranteed to run program," ensuring your course will never be canceled. We have a robust eLearning portfolio including Instructor-Led Online (ILO) courses; and Self-Paced Virtual courses (SPVC). A perfect complement to classroom training, our eLearning portfolio offers something for every need and every budget; simply select the style that suits you.

Be sure to take advantage of our custom training plans to map your path to acquiring skills. Enjoy further savings when you purchase training at a discount with

an IBM Education Pack - online account -- a flexible and convenient way to pay, track, and manage your education expenses online.

Check your local Information Management Training website or chat with your training representative for the most recent training schedule.

Course Name	Classroom	Instructor-Led Online	Self-Paced Virtual Classroom
Informix System Administration	IX81	3X81	2X81
Informix Database Administration: Managing and Optimizing Data	IX22	3X22	2X22
Informix Structured Query Language	IX13	3X13	2X13
Informix 11.7	X30	3X30	2X30

Descriptions of courses for IT professionals and managers are available at

http://www.ibm.com/services/learning/ites.wss/tp/en?pageType=tp_search

For scheduling and enrollment, call IBM training at 800-IBM-TEACH (426-8322) or visit

Technical information

Specified operating environment

Hardware requirements

The following table lists the supported hardware and operating system for the following products:

Informix Ultimate Edition

Processor/System	Operating system	Informix 11.70
IBM Power® (IBM System p)	AIX® 6.1 (64-bit)	64-bit
Sun Sparc	Solaris 10 (64-bit)	64-bit
Intel x64 (Intel® EM64T)	Linux RHEL 5 (64-bit), SUSE 11 (64-bit)	64-bit
HP Itanium®	HP-UX 11.31 (64-bit)	64-bit

The Informix Warehouse Accelerator component is supported on the following platforms:

Processor/System	Operating system	Informix warehouse Accelerator
Intel x64 (Intel EM64T)	Linux RHEL 5 (64-bit), SUSE 11 (64-bit)	64-bit

Software requirements

The program's specifications and specified operating environment information may be found in documentation accompanying the program, if available, such as a readme file, or other information published by IBM, such as an announcement letter. Documentation and other program content may be supplied only in the English language.

Security, auditability, and control

IBM Informix Ultimate Warehouse Edition uses the security and auditability features of the host hardware or software.

The customer is responsible for evaluation, selection, and implementation of security features, administrative procedures, and appropriate controls in application systems and communication facilities.

Ordering information

This product is only available via Passport Advantage. It is not available as shrinkwrap.

These products may only be sold directly by IBM or by authorized IBM Business Partners for Software ValueNet®.

For more information about IBM Software ValueNet, visit

http://www-01.ibm.com/software/lotus/passportadvantage/IBM_SW_ValueNet.html

To locate IBM Business Partners for Software ValueNet in your geography for a specific Software ValueNet portfolio, contact your IBM representative.

IBM Informix Ultimate Warehouse Edition CPU Option	5725-D14	PROCESSOR-Day(s)

Charge metrics definitions

Processor Value Unit (PVU)

Processor Value Unit (PVU) is a unit of measure by which the program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the PVU Table by processor value, brand, type, and model number at the following website and the number of processors made available to the program.

http://www.ibm.com/software/lotus/passportadvantage/pvu_licensing_for_customers.html

IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the program using either Full Capacity licensing or Virtualization Capacity (Sub-Capacity) licensing according to the Passport Advantage Sub-Capacity Licensing Terms (see webpage below). If using Full Capacity licensing, Licensee must obtain PVU entitlements sufficient to cover all activated processor cores¹ in the physical hardware environment made available to or managed by the program, except for those servers from which the program has been permanently removed. If using Virtualization Capacity licensing, Licensee must obtain entitlements sufficient to cover all activated processor cores made available to or managed by the program, as defined according to the Virtualization Capacity License Counting Rules at

http://www.ibm.com/software/lotus/passportadvantage/Counting_Software_licenses_using_specific_virtualization_technologies.html

¹ An Activated processor core is a processor core that is available for use in a physical or virtual server, regardless of whether the capacity of the processor core can be or is limited through virtualization technologies, operating system commands, BIOS settings, or similar restrictions.

Notes

- Some programs may require licenses for the program and what is being managed. In that case, the following applies: In addition to the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- Some programs may be licensed on a managed basis only. In that case, the following applies: Instead of the entitlements required for the program directly, Licensee must obtain PVU entitlements for this program sufficient to cover the processor cores managed by the program.
- A few programs on an exception basis may be licensed on a referenced basis. In that case, the following applies: Rather than obtaining entitlements for the activated processor cores available to the program, Licensee must obtain PVU entitlements for this program sufficient to cover the environment made available to the referenced program as if the program itself were executing everywhere the referenced program was executing, independent of the basis on which the referenced program is licensed.
- Express® and Workgroup programs may be licensed with maximum use terms. In that case, the following applies: The maximum authorized use terms and conditions for PVU licensed IBM Express and Middleware Programs can be found in the IBM Express and Middleware Licensing Guide.

Terms and conditions

The information provided in this announcement letter is for reference and convenience purposes only. The terms and conditions that govern any transaction with IBM are contained in the applicable contract documents such as the IBM International Program License Agreement, IBM International Passport Advantage Agreement, and the IBM Agreement for Acquisition of Software Maintenance.

Licensing

IBM International Program License Agreement including the License Information document and Proof of Entitlement (PoE) govern your use of the program. PoEs are required for all authorized use.

Part number products only, offered outside of Passport Advantage, where applicable, are license only and do not include Software Maintenance.

License Information form number

Program name	Program number	Form number
Informix Ultimate Warehouse Edition	5725-D14	L-STTN-8CSNUJ

The program's License Information will be available for review on the IBM Software License Agreement website

<http://www.ibm.com/software/sla/sladb.nsf>

Limited warranty applies

Yes

Money-back guarantee

For clarification, note that if for any reason you are dissatisfied with the program and you are the original licensee, you may obtain a refund of the amount you paid for it, if within 30 days of your invoice date you return the program and its PoE to the party from whom you obtained it. If you downloaded the program, you may contact the party from whom you acquired it for instructions on how to obtain the refund.

- For clarification, note that for programs acquired under the IBM International Passport Advantage Agreement, this term applies only to your first acquisition of the program.
- For clarification, note that for programs acquired under any of IBM's On/Off CoD software offerings, this term does not apply since these offerings apply to programs already acquired and in use by you.

Volume orders (IVO)

No

Passport Advantage applies

Yes, and through the Passport Advantage website at

<http://www.ibm.com/software/passportadvantage>

This product is only available via Passport Advantage. It is not available as shrinkwrap.
